# Statement of Performance Expectations

## 2019-2020

# NZVIF – OVERVIEW

---

## HOW NZVIF OPERATES

NZVIF is a Crown equity investment agency addressing the significant capital market gap for emerging high growth New Zealand companies that require new risk capital (equity and quasi equity) for growth.

NZVIF leverages its capital to attract increased levels of private investment into high growth New Zealand companies. Investments may be made from proof of concept stage, through to when the company has no further need for risk capital.

Developing relationships with experienced and motivated private investment partners in order to access quality investment deal flow, together with the application of sound investment management practice forms the core of NZVIF's investment approach. Through this approach, NZVIF aims to deliver positive returns to its shareholder over the long-term investment horizon.

NZVIF also has a broader role in market development, including but not limited to, strengthening investor resources and capability, supporting industry-based research, and input on capital markets policy.

Ultimately NZVIF's role is envisaged to be catalytic in contributing to building a self-sustaining early stage investor market in New Zealand.

## NZVIF UNDERWAY

In 2002, NZVIF was established as a venture capital fund-of-funds to partner with the private sector to invest into private New Zealand venture capital funds which would then support the development of innovative companies, from start-up through to growth. NZVIF was also tasked with working alongside the private sector, to build investor capability and put in place best practice industry infrastructure.

In 2008, alongside the venture capital funds, NZVIF introduced the Seed Co-Investment Fund to fill the investment gap for entrepreneurs needing capital to get their business underway. Like venture capital, angel investing is a feature of vibrant start-up ecosystems from Boston, to Israel, to Mumbai. While New Zealand already had many wealthy entrepreneurs and investors willing to provide their own capital and expertise to speed to development of very young companies, achieving scale and professionalism was the next step in building a sustainable angel investor community.

## PROGRESS TO DATE

For the last 18 years NZVIF has been focused on forming investment partnerships alongside private sector angel investors and fund managers, to increase the capital available for promising New Zealand start-ups. We have also worked closely with the industry to build professional capability and investment best practice.

Historically NZVIF has established investment partnerships with 10 venture capital funds and 18 angel investment networks.

Since inception, NZVIF has invested over \$213 million into 287 New Zealand companies through partnerships with venture capital fund and angel networks. Those companies have raised a further \$2.4 billion from private investors with 54% by international investors and earned \$5.6 billion in revenues and \$3.9 billion in export dollars.

Of the companies NZVIF has invested into, 44% are software companies, 11% biotechnology, 7% technology hardware and 4% produce capital goods.

Currently, 7 companies have annual revenues of over \$10 million. Three of these companies now generate over \$50 million in revenues per annum, one of which has revenues of over \$100 million. four companies in the NZVIF portfolio are listed on the NZX or other exchanges, and two companies have been acquired by NZX listed companies.

## FOCUS FOR 2019/20

In August 2017, following consultation with a range of stakeholders in the early stage investment market, the design of the Seed Co-investment Fund was revised. These changes are aimed at improving its investment returns while continuing its cornerstone market development role of attracting more investors and capital to the sector. In addition, to support continued investment activity without relying on further Crown capital, NZVIF is now able to re-invest investment returns.

NZVIF will continue to prudently allocate the \$2.33m p.a. revenue received from the Crown to undertake the wide range of operations it undertakes in the early stage investor market.

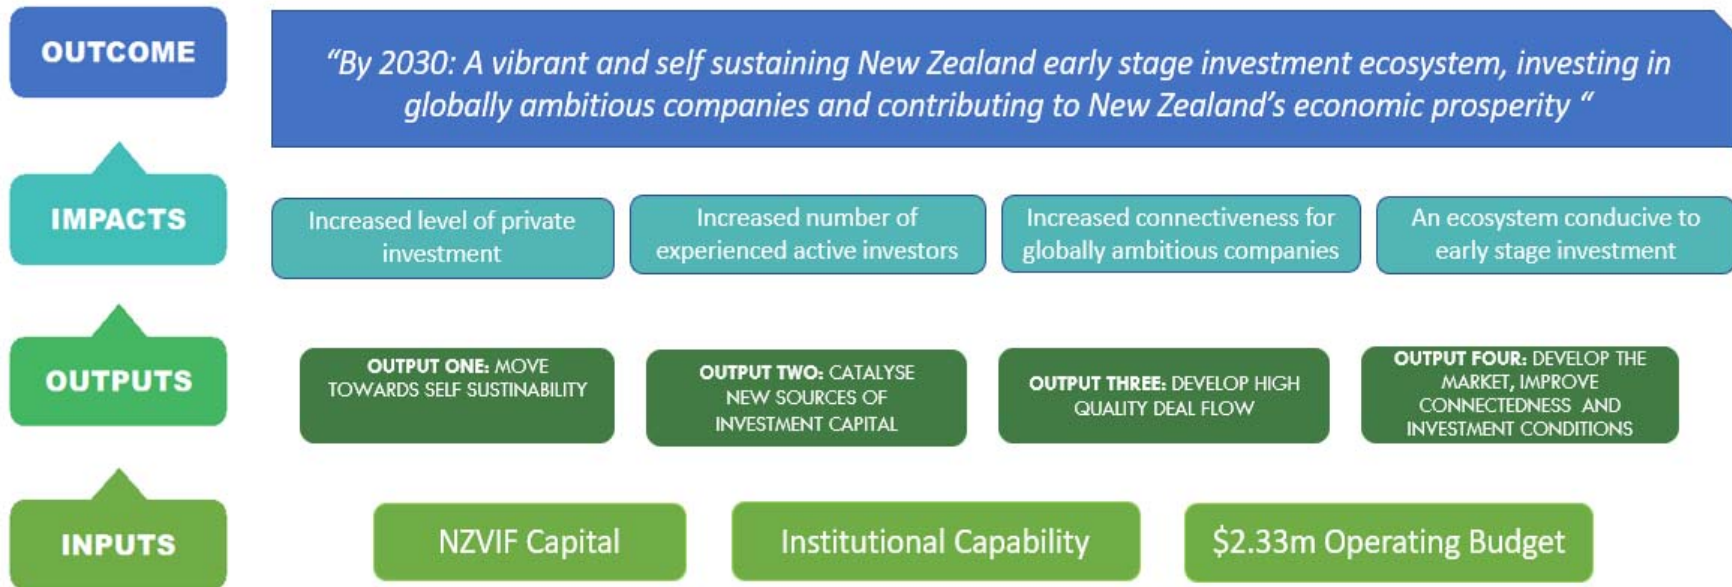

Under the changes to the design of SCIF, NZVIF can co-invest up to \$8 million p.a. into early stage investment opportunities alongside its private sector partners. NZVIF is also committed to investing at least 25% of its annual investment amount into new investment opportunities, with the balance allocated to supporting existing portfolio company growth plans. Over the past two years there has been notable improvement in the quality of the opportunities that NZVIF has reviewed and these companies are raising larger amounts of capital to support their growth.

NZVIF currently has access to a Crown underwrite of \$60m through to 2022.

The Government announced in Budget 2019 a new policy to develop the venture capital markets that involves the Guardians of New Zealand Superannuation and NZVIF. In the future this policy development may require changes to NZVIF's Statement of Intent (SOI) and Statement of Performance Expectations (SPE). NZVIF will review its SOI and SPE in accordance with the Crown Entities Act 2004 as required.

# OUR STRATEGIC FRAMEWORK: WHAT WE ARE TRYING TO ACHIEVE AND HOW WE PLAN TO ACHIEVE IT

---

# SERVICE PERFORMANCE & FINANCIAL MANAGEMENT

---

The following statements provide targets, budgets and performance measures for the year ending 30 June 2020 in accordance with s142 of the Crown Entities Act:

- Statement of performance expectations.
- Statement of forecast comprehensive revenue and expense.
- Statement of forecast movements in equity.
- Statement of forecast financial position.
- Statement of forecast cash flows.
- Notes to the financial statements.

There are no other relevant statements which need to be devised or disclosed (ss142(1)(c) and (e)).

## STATEMENT OF PERFORMANCE EXPECTATIONS

NZVIF has one output 'Seed Co-Investment Fund MCA Investment Fund Management'. We will receive \$2.33m (GST exclusive) in Crown funding in 2019-2020 (2018/19: \$2.33m) to undertake operations in relation to investments. This combined with interest income is sufficient funding to cover all NZVIF operating expenditure for the year.

NZVIF has two separate investment appropriations:

1. The Venture Investment Fund (VIF) which is \$125.45<sup>1</sup> million. The purpose of the VIF historically has been to co-invest with privately managed venture capital funds to catalyse the New Zealand venture capital market; and
2. The Seed Co-investment Fund (SCIF) which is \$46.77 million. The purpose of the SCIF is to invest in globally aspirational early stage high growth companies alongside Qualified investors.

NZVIF can reinvest proceeds received from exits into new investments.

To achieve our Outcome as per the Statement of Intent, we will provide the following four outputs:

1. **Move to sustainability through making and managing investments** - co-invest into eligible industries and stages with qualified investment partners and recycle returned capital.
2. **Attract capital through demonstration effect** – catalyse new sources of investment capital through opportunity and investment return demonstration effect.
3. **Origination Pipeline** – develop high quality deal flow through diverse investment partnerships.
4. **Work with industry stakeholders** - to develop the market, improve connectiveness and investment conditions.

We deliver the output by administering and monitoring of the NZVIF Venture Capital and the NZVIF Seed Co-investment Funds.

We will report against qualitative and quantitative measures in the 2019-2020 Annual Report.

---

<sup>1</sup> Excludes \$60 million underwrite.

## OUTPUT ONE: MOVE TO SUSTAINABILITY BY MAKING AND MANAGING INVESTMENTS

- We will make portfolio investments in line with our mandate.
- We will manage investments to optimize portfolio returns.
- We will recycle investment proceeds into new investments

Quantity Measures	Actual 15/16	Actual 16/17	Actual 17/18	Estimated Actual 18/19	Forecast 19/20
Number of new companies receiving investment	26	28	29	28	25
Total amount invested into companies	\$6.848m	\$5m	\$7.389m	\$8m - \$10m	\$8m
Total proceeds from divestment of investments	\$54,762	\$3.253m	\$0.19m	\$2.361m	\$2.5m

### Quality Measures

Over 90% of the NZVIF investment portfolio (by number) in seed, start-up and early expansion stage investments.

- Currently over 95% of NZVIF investments are in seed, start-up and early expansion stage.

100% of investment transactions will meet NZVIF eligibility criteria.

- All investments are consistent with NZVIF mandate requirements.

## OUTPUT TWO: ATTRACT CAPITAL - CATALYSE NEW SOURCES OF INVESTMENT CAPITAL

- We will seek to grow the number of experienced investors investing into early stage NZ companies, through demonstration of quality investment opportunities and investment returns.

Quantity Measures	Actual 15/16	Actual 16/17	Actual 17/18	Estimated Actual 18/19	Forecast 19/20
Number of companies attracting Series A/B investment	n/a	n/a	n/a	8	10
Number of companies with offshore investment	n/a	n/a	n/a	9	10

### Quality Measure

The quantity measures for output 2 relate to the new NZVIF operational model post the changes to SCIF mandate.

**OUTPUT THREE: DEVELOP HIGH QUALITY DEAL FLOW THROUGH THE ESTABLISHMENT OF DIVERSE INVESTMENT PARTENRSHIPS**

- We will develop deep trusted partnerships with experienced early stage investors and identify credible lead investors to represent us.

Quantity Measures	Actual 15/16	Actual 16/17	Actual 17/18	Estimated Actual 18/19	Forecast 19/20
Number of investment opportunities reviewed	n/a	n/a	165	162	150
Number of active fulltime lead investors in the market	n/a	n/a	30	35	40

**Quality Measure**

The quantity measures for output 3 relate to the new NZVIF operational model post the changes to SCIF mandate. Under the revised SCIF mandate NZVIF has established co-investment relationships with early stage investor groups who are not traditional angel investor networks.

## OUTPUT FOUR: WORK WITH INDUSTRY STAKEHOLDERS - TO DEVELOP THE MARKET AND IMPROVE INVESTMENT CONDITIONS

- We will support industry professional development programmes.
- We will advise Government on policy changes to improve the investment environment.
- We will seek to improve connectiveness both within the NZ ecosystem and offshore.

Quantity Measures	Actual 15/16	Actual 16/17	Actual 17/18	Estimated Actual 18/19	Forecast 19/20
Industry development initiatives undertaken in conjunction with NZVCA and AANZ.	8	4	4	4	4
Advice provided to Government to assist market development.	1	1	2	1	1
<p><b>Quality Measure</b></p> <p>Best practice initiatives accepted and adopted by the industry; Dissemination of angel investing best practice to NZVIF investment partnerships.</p> <ul style="list-style-type: none"> <li>▪ Co-sponsor AANZ and NZVCA professional development programmes.</li> <li>▪ Continue to work with the Government to implement policy.</li> </ul>					

# STATEMENT FROM THE BOARD OF DIRECTORS

---

This Statement of Performance Expectations for the period 1 July 2019 to 30 June 2020 is submitted pursuant to the Crown Entities Act 2004. The forecast financial statements have been prepared in accordance with New Zealand Generally Accepted Accounting Principles (NZGAAP).

The underlying assumptions of this document have been authorised as appropriate for issue by the Board of Directors of the New Zealand Venture Investment Fund Limited in accordance with its role under the Crown Entities Act 2004.

The Board and management of NZVIF accept responsibility for establishing and maintaining a system of internal control designed to provide reasonable assurance as to the integrity and reliability of financial and non-financial reporting.

# NOTES TO THE FORECAST FINANCIAL STATEMENTS

---

## 1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

### REPORTING ENTITY

New Zealand Venture Investment Fund Limited and its subsidiaries are companies incorporated in New Zealand under the Companies Act 1993.

The parent company - New Zealand Venture Investment Fund Limited - and its subsidiaries are referred to throughout these financial statements as NZVIF. NZVIF is domiciled in New Zealand.

The primary objective of NZVIF is the development of a vibrant early-stage capital market, both formal (venture capital) and informal (angel). NZVIF has designated itself as a Public Benefit Entity (PBE) for financial reporting purposes.

The registered office for NZVIF is Level 1, 12 Madden Street, Wynyard Quarter, Auckland.

The forecast financial statements of the group are for the year ended 30 June 2020.

### BASIS OF PREPARATION

#### Statement of compliance

The prospective financial statements are prepared in accordance with New Zealand Generally Accepted Accounting Principles (NZGAAP). They comply with the Crown Entities Act 2004 and other Financial Reporting Standards as appropriate for public benefit entities.

These prospective financial statements are prepared in accordance with the requirements of the Public Benefit Entity (PBE) accounting standards and in accordance with Tier 2 PBE accounting standards and comply with PBE FRS 42 Prospective Financial Statements.

The prospective financial statements are for the Statement of Service Performance for the 2019/2020 year therefore, actual results are not reflected. NZVIF is responsible for the prospective financial statements presented, including the appropriateness of the assumptions underlying the prospective financial statements and all other required disclosures.

The information contained in the financial statements is not suitable to be used for any purpose other than to give an indication of the magnitude of the company's financial requirements for the period of the Statement of Service Performance.

The actual financial results for the period covered are likely to vary from the information presented and the variations may be material.

### **Measurement base**

These financial statements have been prepared on an historical cost basis, except where modified by the revaluation of certain items of property, plant and equipment, and the measurement of financial assets at fair value.

### **Presentation currency**

These financial statements are presented in New Zealand dollars (\$).

### **Judgments and estimations**

In preparing these financial statements NZVIF has made estimates and assumptions concerning the future. These estimates and assumptions may differ from the subsequent actual results. Estimates and assumptions are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

It is not intended to update these prospective financial statements subsequent to presentation. However, the Government announcement in Budget 2019 to develop the venture capital markets may require changes to these prospective financial statements.

Updates up until presentation will be made if circumstances arise requiring changed forecasts. Assumptions in these financial statements are based on business as usual and historic performance but include implementation costs for new policy development.

## **SIGNIFICANT ACCOUNTING POLICIES**

The following specific accounting policies, which materially affect the measurement of financial performance, financial position and cash flows, have been applied consistently to all periods presented in these forecast financial statements.

### **Basis of consolidation**

Subsidiaries are entities in which the company has the capacity to determine the financing and operating policies and from which it has an entitlement to significant ownership benefits.

The consolidated financial statements include the parent company and its subsidiary accounted for using the purchase method. All significant intercompany transactions are eliminated on consolidation. In the parent's financial statements investments in the subsidiary are valued at cost.

### **Revenue recognition**

Revenue is recognised as follows:

### **Revenue from the Crown**

Revenue is recognised to the extent that it is probable that the economic benefits will flow to NZVIF and the revenue can be reliably measured. Revenue shown in the Statement of comprehensive revenue and expense comprises the amounts received and receivable by NZVIF for services supplied to the Crown.

### **Interest income**

Revenue is recognised as interest accrues using the effective interest method. This is a method of calculating the amortised cost of a financial asset and allocating the interest income over the relevant period using the effective interest rate, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to the net carrying amount of the financial assets.

### **Dividend income**

Dividend income is recognised when the right to receive payment is established.

### **Administration expenses**

Administration expenses comprise operating expenditure and consist of amortization, audit fees, depreciation, directors' fees, employee costs, lease costs and other administrative expenditure.

### **Goods and services tax**

The forecast consolidated financial statements of NZVIF have been prepared on a GST exclusive basis except for receivables and payables.

### **Taxation**

Income tax expense comprises both current tax and deferred tax and is calculated using tax rates that have been enacted or substantively enacted by balance date.

Current tax is the amount of income tax payable based on the taxable profit for the current year, plus any adjustments to income tax payable in respect of prior years.

Deferred tax is the amount of income tax payable or recoverable in future periods in respect of temporary differences and unused tax losses. Temporary differences are differences between the carrying number of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit.

The measurement of deferred tax reflects the tax consequences that would follow from the way the entity expects to recover or settle the carrying amount of its assets and liabilities.

Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are recognised to the extent that it is probable that taxable profits will be available against which the deductible temporary differences or tax losses can be utilised.

Current tax and deferred tax is charged or credited to the Statement of comprehensive revenue and expense, except when it relates to items charged or credited directly to equity, in which case the tax is dealt with in equity.

### **Cash & cash equivalents**

Cash and cash equivalents include cash on hand, deposits held at call with banks both domestic and international, other short-term, highly liquid investments, with original maturities of three months or less and bank overdrafts.

### **Accounts receivable**

Accounts receivable are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less provision for impairment losses due to bad and doubtful accounts.

### **Investments - current**

Investments include term deposits held with banks both domestic and international, other short-term, highly liquid investments, with original maturities of three months or more.

### **Prepayments**

Prepayments consist of management fees invoiced or paid, for the first quarter of the next year, and director's liability insurance paid in advance. Prepaid directors' liability insurance is expensed on a straight-line basis over the term of the insurance policy.

### **Property, plant and equipment**

#### **Owned assets**

Items of property, plant and equipment are measured at cost less aggregate depreciation and impairment losses.

Where material parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items of property, plant and equipment.

## Additions

The cost of an item of property, plant and equipment is recognised as an asset only when it is probable that future economic benefits or service potential associated with the item will flow to the Company and the cost of the item can be measured reliably.

Where an asset is acquired at no cost, or for a nominal cost, it is recognised at fair value when control over the asset is obtained.

## Disposals

Gains and losses on disposals are determined by comparing the proceeds with the carrying amount of the asset. Gains and losses on disposals are included in the Statement of comprehensive revenue and expense.

## Subsequent costs

Subsequent costs are added to the carrying amount of an item of property, plant and equipment when that cost is incurred if it is probable that the future economic benefits embodied with the item will flow to the company and the cost of the item can be measured reliably. All other costs are recognised in the Statement of comprehensive revenue and expense as an expense as incurred.

## Depreciation

Depreciation is charged using the diminishing value method at the following rates:

Computer equipment	33%-60%
Office equipment	11%-60%
Leasehold improvements	9%-48%

## Impairment of non-financial assets

Assets with a finite useful life are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use.

## Intangible Assets

### Software acquisition

Acquired computer software licenses are capitalised based on the costs incurred to acquire and bring to use the specific software.

Costs associated with maintaining computer software are recognised as an expense when incurred.

Costs associated with the development and maintenance of the Company's website are recognised as an expense when incurred.

### Software development

NZVIF capitalises the direct costs associated with the development of network and business software for internal use where project success is regarded as probable. Capitalised costs include external direct costs of materials and services consumed, payroll and direct payroll-related costs for employees (including contractors) directly associated with the project and interest costs incurred while developing the software. Software developed for internal use is depreciated over its useful life.

### Amortisation

Computer software is amortised at a diminishing value rate of 60%. Amortisation begins when the asset is available for use and ceases at the date that the asset is disposed of. The amortisation charge for each period is recognised in the Statement of comprehensive revenue and expense.

Where estimated useful lives or recoverable values have diminished due to technological change or market conditions, amortisation is accelerated or the carrying value is impaired.

### Investments – non-current

Investment assets held at fair value through profit or loss are measured initially at fair value excluding any transaction costs that are directly attributable to the acquisition or issue of the financial asset. After initial recognition, all instruments held at fair value through profit or loss are measured at fair value with changes in their fair value recognised in the Statement of comprehensive revenue and expense.

### NZVIF Venture Capital Funds

NZVIF co-invests, alongside private sector investors, in primarily early-stage venture capital investments and these investments represent equity owned directly by NZVIF subsidiaries. These investments are made through or by co-investing alongside venture capital funds, which are managed by private sector venture capital fund managers. NZVIF does not exercise significant influence over these individual investment portfolio investments.

The fair value of NZVIF venture capital fund investments has been determined by NZVIF in accordance with IPEV guidelines.

The IPEV recommends that investors in private equity and venture capital funds should use the fund managers reported valuation as an input in determining the fair value of their interest in the fund's investments. The IPEV also recommends that investors have the appropriate processes and controls in place to monitor the fund manager and assess the data received. Where NZVIF is an investor into a venture capital fund, the fund manager is contractually required to report to NZVIF on an on-going basis and NZVIF monitors the performance and valuation of the portfolio. The reported fair value of the

investment by each fund manager has been used as an input for the fair value assessment performed by NZVIF.

NZVIF has reviewed the process undertaken by the venture capital fund manager when valuing NZVIF investments and are satisfied that the valuation process complies with the fund managers' contractual requirements.

### **NZVIF Seed Co-investment Fund**

NZVIF co-invests, alongside private sector investors, in seed and start-up stage investments and these investments represent equity owned directly through a 100% owned NZVIF subsidiary. NZVIF is typically a passive investor and does not take a seat on investee company boards; these roles are undertaken by NZVIF's co-investment partners. However, NZVIF reserves certain shareholder rights and may make subsequent investment decisions in certain circumstances.

As at 30 June 2020 the valuation of the Seed Co-investment Fund's investments is based on the price of the most recent investment made by external investors, unless there is evidence that the value of the investment should be adjusted as the performance of the investment is significantly below the expectations on which the investment was based, leading to a diminution in value.

PBE standards make specific reference to investments held by venture capital organisations and that all investments must be recognised at fair value, except for those where control exists. Under PBE IPSAS 29 (AG 14), an investment by a venture capital organisation is a financial instrument. The appropriate standard dealing with investment in associates is not applicable and the financial instruments standard applies.

### **Leased assets**

Operating lease payments, where the lessors effectively retain substantially all the risks and benefits of ownership of the leased items, are recognised in the Statement of comprehensive revenue and expense in equal installments over the term of the lease.

### **Foreign currencies**

Transactions denominated in a foreign currency are converted at the functional currency exchange rate at the date of the transaction.

Transactions in foreign currency that are not settled in the accounting period, resulting in monetary assets and liabilities denominated in foreign currencies at the reporting date are translated to New Zealand dollars at the foreign exchange rate ruling at that date. Foreign exchange differences arising on their translation are recognised in the Statement of comprehensive revenue and expense.

## Financial instruments

Non-derivative financial instruments comprise investments in shares, trade and other receivables, cash and cash equivalents, loans and borrowings, and trade and other payables.

Non-derivative financial instruments are recognised initially at fair value plus, for instruments not at fair value through profit or loss, any directly attributable transaction costs. After initial recognition, non-derivative financial instruments are measured as described below.

A financial instrument is recognised if the company becomes a party to the contractual provisions of the instrument. Financial assets are derecognised if the company's contractual rights to the cash flows from the financial assets expire or if the company transfers the financial asset to another party without retaining control or substantially all risks and rewards of the asset.

Regular purchases and sales of financial assets are accounted for at trade date. i.e. the date the company commits itself to purchase or sell the asset. Financial liabilities are derecognised if the company's obligations specified in the contract expire or are discharged or cancelled.

NZVIF classifies its NZVIF Venture Capital Funds and Seed Co-investment Fund investments under the category "financial assets at fair value through surplus or deficit" - designated as such upon initial recognition. This is because PBE IPSAS 29 (AG 14(a)) indicates that investments held by venture capital organisations whose business is investing in financial assets with a view to profiting from their total return in the form of interest, dividends or from changes in their value, should be designated at fair value through profit and loss. Realised and unrealised gains and losses arising from changes in the fair value of the 'financial assets at fair value through surplus or deficit' category are included in the Statement of comprehensive revenue and expense in the period in which they arise.

## Creditors and other payables

Creditors and other payables are initially measured at fair value and subsequently measured at amortised cost using the effective interest method.

## Employee entitlements

Provision is made for annual leave entitlements estimated to be payable to employees based on statutory and contractual requirements. The provision is equal to the present value of the estimated future cash outflows because of employee services provided at balance date.

## Statement of cash flows

The following are the definitions of the terms used in the Statement of Cashflows:

Cash is cash and cash equivalents net of bank overdrafts.

Investing activities are those relating to the acquisition, holding and disposal of property, plant & equipment and investments. Investments can include securities not falling within the definition of cash.

Financing activities are those activities that result in changes in the size and composition of the capital structure of NZVIF Limited. This includes both equity and debt not falling within the definition of cash. Dividends paid in relation to the capital structure are included in financing activities.

Operating activities include all transactions and other events that are not investing or financing activities.

### **Segment information**

A business segment is a group of assets or operations engaged in providing products or services that are subject to risks and rewards that are different from those of other business segments. A geographic segment is engaged in providing products or services within an economic environment that are subject to risks and returns that are different from those of a segment operating in other economic environments. NZVIF operates predominantly in the venture capital investment industry. All operations of the Company are carried out in New Zealand.

### **Related party loans**

NZVIF accounts for related party loans at their cost less impairment, with impairment based on the underlying value of the subsidiary's venture capital investments, which will have been purchased through the loan funding. This treatment is permitted following the assessment that the loans are outside the scope of PBE IPSAS 29 Financial Instruments: Recognition and Measurement. The accounting treatment for the loans is in accordance with the cost method of an investment in a subsidiary under PBE IPSAS 6 Consolidated and Separate Financial Statements, which gives an entity the option of accounting for an investment in a subsidiary either at cost (less impairment) or under PBE IPSAS 29. Furthermore, as disclosed in Note 15, the terms of the loans are no interest with limited recourse of repayment. Accordingly, the loans have characteristics like an equity instrument. A further consideration in carrying related party loans at cost (less impairment) is that their fair value cannot be reliably determined at initial recognition due to difficulties in forecasting the obligations to repay the loans and the timing of such repayments.

### **Significant assumptions adopted in the preparation of forecast financial statements**

Fund management fees are paid to external fund managers from capital drawn from Crown for investment. They are not paid from operational funding received from the Crown. These fees are classified as an expense of NZVIF for accounting purposes only and are not part of the operational costs of NZVIF. The loss reported in the Statement of forecast comprehensive revenue and expense for the year ended 30 June 2019 does not reflect the actual loss of NZVIF.

Due to uncertainties on investment valuations, no realised/unrealised gains or losses are included in the forecast. However, there is a reasonable expectation that the overall portfolio will increase in value over the longer term. Performance returns are highly likely to vary every year and some years may be negative.

## 2. CAPITAL COMMITMENTS

The following commitments have been made by NZVIF. This is the estimated capital expenditure contracted for at balance date but not provided for (VIF and SCIF):

	Forecast 30 June 2020	Estimated 30 June 2019
Firm commitment remaining	\$4,700,000	\$8,000,000
Conditional commitment	\$0	\$0
Total	\$4,700,000	\$8,000,000

These commitments reflect the capital commitment in respect of future investments in current venture capital investments held. Due to the inherent nature of this type of investment, the time frame of these commitments cannot be predicted because capital can be called by investment managers at any time, however it is unlikely that NZVIF would be required to pay the entire outstanding commitment at one time. This is supported by historical trends.

The Crown has a \$60 million underwrite facility in place for NZVIF committed until 2022.
